

# Sketch 1

## Phone Version

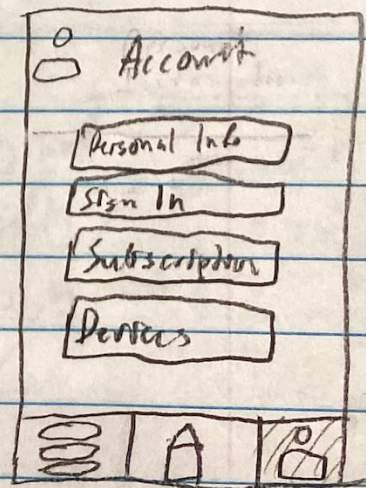

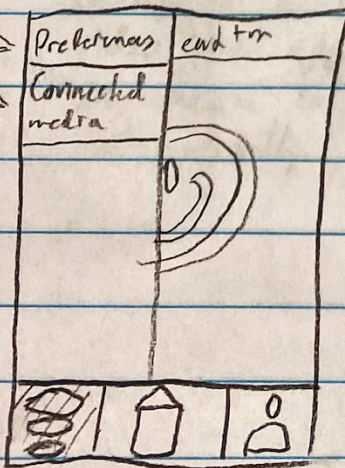

click to see  
account information,  
subscriptions, if this app  
continues as a paid service,

Click to  
see media  
preferences, Apps  
that are connected  
to your account, etc.

This returns you  
to home screen  
which is the screen  
that is shown here  
that allows you  
to turn on AdBreak™

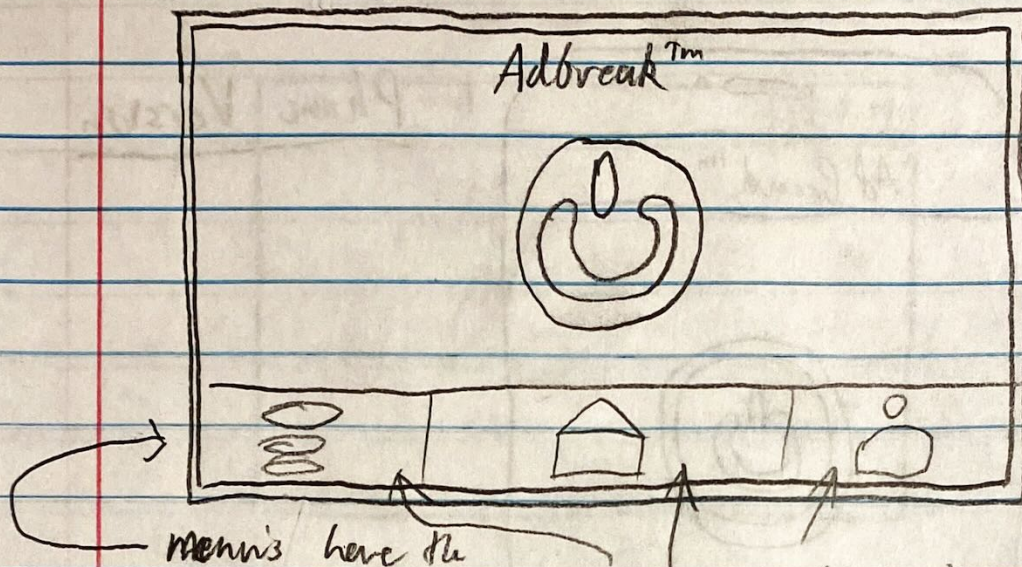

Click these  
to go to  
two separate  
pages that  
have their  
own functions

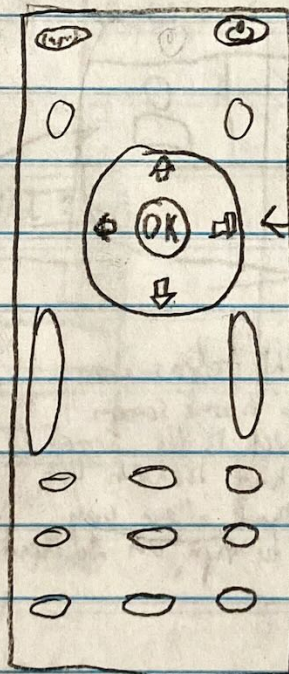

# Sketch 2

## TV app

menus here the same function as mobile app

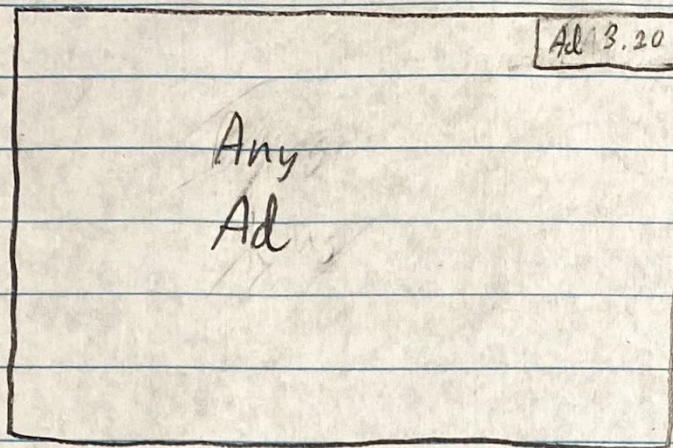

these will be sliders depends on where an mont would take you.

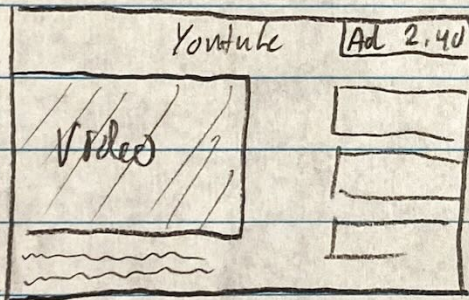

Navigate everything with remote arrow keys and OK or enter button depends on remote

# Sketch 3

↓  
When ad break is turned on  
It will detect the ad and switch to different  
media based on preferences

ad ends  
and the media  
is switched back  
to the main thing  
being watched

↑  
Since this person had  
a preference to  
switch to a youtube  
video the app changed  
the media to youtube  
automatically
